DETAILED ACTION

1. This office action is in response to amendment filed May 9, 2006. Claims 1-20 were previously pending. Applicant amended claims 1 and 12. Claims 1-20 are pending.
2. Applicant's amendment overcame the rejection of claims 1-10 and 12-21 under 35 U.S.C. 102(b) as anticipated by Mallia, and the rejection of claims 12 and 22 under 35 U.S.C. 103(a) over Mallia and Strulovici.
3. Applicant's amendment to the specification obviated the objection presented in the previous office action.
4. Applicant's response to the Requirement for Information has been considered and was found to be satisfactory.

Terminal Disclaimer

5. The terminal disclaimer filed on May 9, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the U.S. Patent No. 6,689,565 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Reasons for Allowance

6. The following is an examiner's statement of reasons for allowance: Applicant's invention is a kit comprising a fluorescently labeled compound and a liquid reagent comprising a polymer with multivalent metal cations associated with it. The closest prior art reference, Mallia, teaches a Whatman paper, which comprises a cellulose with Fe³⁺ cations associated with it, therefore, does not teach a liquid reagent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
